ENFORCEMENT OF CIVIL LIABILITIES

The Company is a Public Limited (Listed) Company under the laws of India and all the Directors, and all Executive Officers are residents of India. It may not be possible or may be difficult for investors to affect service of process upon the Company or these other persons outside India or to enforce against them in courts in India, judgments obtained in courts outside India. India is not a party to any international treaty in relation to the automatic recognition or enforcement of foreign judgments.

However, recognition and enforcement of foreign judgments is provided for under Sections 13, 14 and 44A of the Code of Civil Procedure, 1908, as amended (the "Civil Procedure Code"). Section 44A of the Civil Procedure Code provides that where a certified copy of a decree of any superior court (within the meaning of that section) in any country or territory outside India which the Government of India has by notification declared to be a reciprocating territory, is filed before a district court in India, such decree may be executed in India as if the decree has been rendered by a district court in India. Section 44A of the Civil Procedure Code is applicable only to monetary decrees or judgments not being in the nature of amounts payable in respect of taxes or other charges of a similar nature or in respect of fines or other penalties. Section 44A of the Civil Procedure Code does not apply to arbitration awards even if such awards are enforceable as a decree or judgment. Among others, the United Kingdom, Singapore, Hong Kong and the United Arab Emirates have been declared by the Government of India to be reciprocating territories within the meaning of Section 44A of the Civil Procedure Code.

The United States has not been declared by the Government of India to be a reciprocating territory for the purposes of Section 44A of the Civil Procedure Code. Under Section 14 of the Civil Procedure Code, an Indian court shall, on production of any document purporting to be a certified copy of a foreign judgment, presume that the judgment was pronounced by a court of competent jurisdiction unless the contrary appears on the record; but such presumption may be displaced by proving want of jurisdiction.

A judgment of a court in any non-reciprocating territory, such as the United States, may be enforced in India only by a suit upon the judgment subject to Section 13 of the Civil Procedure Code, and not by proceedings in execution. Section 13 of the Civil Procedure Code, which is the statutory basis for the recognition of foreign judgments (other than arbitration awards), states that a foreign judgment shall be conclusive as to any matter directly adjudicated upon between the same parties or between parties under whom they or any of them claim litigating under the same title except where:

- The judgment has not been pronounced by a court of competent jurisdiction.
- The judgment has not been given on the merits of the case.
- The judgment appears on the face of the proceedings to be founded on an incorrect view of international law or a refusal to recognize the law of India in cases where such law is applicable.
- The proceedings in which the judgment was obtained are opposed to natural justice.
- The judgment has been obtained by fraud; and/or
- The judgment sustains a claim founded on a breach of any law in force in India.

A suit to enforce a foreign judgment must be brought in India within three years from the date of the judgment in the same manner as any other suit filed to enforce a civil liability in India. It is unlikely that a court in India would award damages on the same basis as a foreign court if an action is brought in India. In addition, it is unlikely that an Indian court would enforce foreign judgments if it considered the amount of damages awarded as excessive or inconsistent with public policy or if the judgments are in breach of or contrary to Indian law. A party seeking to enforce a foreign judgment in India is required to obtain prior approval from the Reserve Bank of India to repatriate any amount recovered pursuant to execution of such judgment. Any judgment in a foreign currency would be converted into Rupees on the date of such judgment and not on the date of payment and any such amount may be subject to income tax in accordance with applicable laws. The Company cannot predict whether a suit brought in an Indian court will be disposed of in a timely manner or be subject to considerable delays.

SECTION II: RISK FACTORS

An investment in Equity Shares involves a high degree of risk. You should carefully consider all the information in this Draft Letter of Offer, including the risks and uncertainties summarized below, before making an investment in our Equity Shares. The risks described below are relevant to the industries our Company is engaged in, our Company and our Equity Shares. To obtain a complete understanding of our Company, you should read this section in conjunction with the chapters titled 'Our Business Overview' and 'Management's Discussion and Analysis of Financial Condition and Results of Operations' beginning on page numbers 77 and 96, respectively, of the Draft Letter of Offer as well as the other financial and statistical information contained in the Draft Letter of Offer.

If any one or more of the following risks as well as other risks and uncertainties discussed in the Draft Letter of Offer were to occur, our business, financial condition and results of our operation could suffer material adverse effects and could cause the trading price of our Equity Shares and the value of investment in the Equity Shares to materially decline which could result in the loss of all or part of investment. Prospective investors should pay particular attention to the fact that our Company is incorporated under the laws of India and is therefore subject to a legal and regulatory environment that may differ in certain respects from that of other countries.

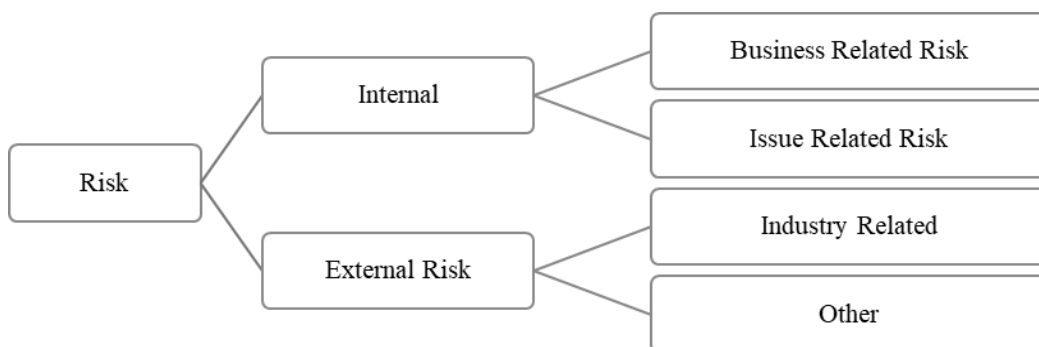

The Draft Letter of Offer also contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of many factors, including the considerations described below and elsewhere in the Draft Letter of Offer. These risks are not the only ones that our Company face. Our business operations could also be affected by additional factors that are not presently known to us or that we currently consider to be immaterial to our operations. Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify financial or other implication of any risks mentioned herein.

Materiality

The Risk factors have been determined on the basis of their materiality, which has been decided on the basis of following factors:

1. Some events may not be material individually but may be material when considered collectively.
2. Some events may have an impact which is qualitative though not quantitative.
3. Some events may not be material at present but may have a material impact in the future.

Classification of Risk Factors

Internal Risks

- Our Company is involved in certain legal proceedings. Any adverse decision in such proceedings may cause monetary losses to the Company.***

Our Company is currently involved in certain legal proceedings. These legal proceedings are pending at different levels of adjudication before various levels with concerned judicial bodies. The summary of outstanding litigation as on date in relation to criminal matters, tax matters and actions by regulatory/statutory authorities against our Company, Directors and Promoter, as applicable, have been set out under “*Outstanding Litigation and Defaults*” on page 102.

A summary of material outstanding legal proceedings as on the date of this Draft Letter of Offer, including the aggregate approximate amount involved to the extent ascertainable, is set out below:

Name	By/Against	Civil Proceedings	Criminal Proceedings	Tax Proceedings	Actions by regulatory authorities	Amount Involved (₹ Lakhs)
Company	By	2	-	-	-	235.28
	Against	1	-	-	-	22.05
Promoter	By	-	-	-	-	-
	Against	-	-	-	-	-
Group Companies/Entities	By	-	-	-	-	-
	Against	-	-	-	-	-
Directors other than promoters	By	-	-	-	-	-
	Against	-	-	-	-	-

Adverse decisions in any of the aforesaid outstanding legal proceedings may have a material adverse effect on our business, financial condition, cash flows and results of operations. If the courts or tribunals rule against our Company, we may face monetary and/or reputational losses and may have to make provisions in our financial statements, which could increase our expenses and our liabilities.

- Basic raw material for our Company is cotton, which is a cyclical crop and depends upon a lot of natural factors.***

Any abrupt climatic changes, thereby hampering the cotton crop production in the country, may affect the Company’s production capacities. Any increase in cotton prices may have an adverse effect on our business and a consequent negative impact on our business, financial condition and results of operations. For example, if the price of cotton increases and we are not able to increase the price of our towels manufactured by us, then the margins for our towel business will be reduced. Any material shortage or interruption in the domestic supply or deterioration in quality of cotton due to natural causes or other factors could result in increased costs that we may not be able to pass on to customers.

Further, the failure of our suppliers to deliver cotton in the necessary quantities or as per the required schedule, of a specified quality/ standard/ specification, may adversely affect our production processes thereby giving rise to contractual penalties or liabilities, loss of customers and/ or an adverse effect on our reputation, which may in turn result in a material adverse effect on our business, financial condition and results of operations. Additionally, a material shortage in supply of cotton could result in the failure

to meet our sales obligations, which may in turn result in a loss of revenue, customers and cash flows.

- 3. Our business is dependent on our manufacturing facilities, and we are subject to certain risks in our manufacturing process. Any unscheduled, unplanned or prolonged disruption of manufacturing operations or shutdown of our manufacturing facilities may have a material adverse effect on our business, financial condition and result of operations.***

Our business is dependent on our ability to manage our manufacturing operations, which are subject to various operating risks and factors including, among others, breakdown and/or failure of equipment or industrial accidents which may entail significant repair and maintenance costs, increases in raw materials, consumables and manpower costs, challenges in achieving targeted utilization levels at our manufacturing facilities, product quality issues, disruption in electrical power or water resources, timely grant or renewal of approvals, severe weather conditions, natural disasters and outbreaks of infectious diseases, natural calamities, labor disputes, civil disruptions and changes in the regulations and policies of the states or local governments where our manufacturing facilities are located. Although we have not experienced any material instances of such disruptions, we cannot assure you that we will not be subject to these risks in the future. Any of the foregoing could cause delays in our operations or require us to shut down the affected manufacturing facility.

In addition, we may also be subject to manufacturing disruptions due to delays in receiving regulatory approvals, which may require our manufacturing facilities to cease or limit production until the required approvals are received, or disputes concerning these approvals are resolved. Any material disruption at our manufacturing facilities, including but not limited to power failure, fire, strikes, lockouts and unexpected mechanical failure of equipment, could reduce our ability to meet the conditions of our business contracts and earnings for the affected period. Although we have not experienced such material disruptions in the past, we cannot assure you that our manufacturing facilities will be able to operate smoothly in the future. In addition, if we are unable to obtain raw materials and equipment on commercially acceptable terms, or at all, or if our third-party suppliers fail to deliver the raw materials and equipment to us within a reasonable stipulated time, it could lead to disruptions, slowdown or shutdown of operations at our manufacturing facilities and R&D centers. Our inability to effectively respond to any such disruption, slowdown or shutdown, and rectify any disruption in a timely manner and at an acceptable cost, could result in us being unable to satisfy our contractual commitments, which could have an adverse effect on our business, financial condition, cash flows and results of operations.

- 4. We do not have long term contracts with our customers.***

We have not executed any long-term contracts with our domestic or international customers. Our sales are based on purchase orders that are placed by our customers depending on their requirements, with typical delivery periods ranging from one to three months. In the absence of long-term contracts, there can be no assurance that a particular customer will continue to source their supplies from us in the future. A reduction in the purchase orders placed by the customers may adversely affect our business and revenues; and may require us to shift to different markets and/or look for alternative buyers. Further, any loss of our major customers arising out of competition or from cheaper sources can lead to reduced margins and our results and operations may be affected.

- 5. Our failure to accurately forecast and manage inventory could result in an unexpected shortfall and/or surplus of products, which could have a material adverse impact on our profitability.***

We monitor our inventory levels based on our projections of future demand. Because of the length of time necessary to produce commercial quantities of our products, we make production decisions well in advance of sales for some of our products. An inaccurate forecast of demand may result in unavailability/surplus of products. This unavailability of products in high demand may depress sales volumes and adversely affect customer relationships. Conversely, an inaccurate forecast can also result in an over-supply of products, which may increase costs, negatively impact cash flow, reduce the quality of inventory, erode margins substantially due to writing down of inventory cost from its carrying value to the net realizable value. Any of the aforesaid circumstances could have a material adverse effect on our business, results of operations and financial condition.

6. *Our indebtedness, including various conditions and restrictions imposed on us by our financing agreements, could adversely affect our ability to react to changes in our business, and we may be limited in our ability to use debt to fund future capital needs.*

As of June 30, 2023, our long-term borrowings (including installments due within one year) amounted to ₹ 3,000.51 Lakhs. Our substantial indebtedness could:

- require us to dedicate a substantial portion of our cash flow from operations to payments in respect of our indebtedness, thereby reducing the availability of our cash flow to fund working capital, capital expenditures and other general corporate expenditures;
- increase our vulnerability to adverse general economic or industry conditions;
- limit our flexibility in planning for, or reacting to, competition and/or changes in our business or our industry;
- limit our ability to borrow additional funds;
- restrict us from making strategic acquisitions, introducing new products or services or exploiting business opportunities; and
- place us at a competitive disadvantage relative to competitors that have less debt or greater financial resources.

We cannot guarantee that we will be able to generate enough cash flow from operations or that we will be able to obtain enough capital to service our debt or fund our planned capital expenditures. In addition, adverse changes in the business conditions affecting us could cause the amount of refinancing proceeds to be insufficient to meet our interest payments or fully repay any existing debt upon maturity and we may be unable to fund the payment of such shortfalls. If we cannot obtain alternative sources of financing or our costs of borrowings become significantly more expensive, then our financial condition and results of operations will be adversely affected.

Moreover, the agreements governing certain of our debt obligations include terms that, in addition to certain financial covenants, which, amongst others, restrict our ability to make capital expenditures and investments, declare dividends, effect a scheme of amalgamation or reconstitution, alter our constitutional documents, undertake new projects, change our management and board of directors, modify our promoter/ promoter group shareholding, and modify our capital structure. Any failure on our part to comply with these terms in our loan agreements would generally result in events of default under these loan agreements. In such a case, the lenders under each of these respective loan agreements may, at their discretion, accelerate payment and declare the entire outstanding amounts under these loans due and payable, and in certain instances, enforce their security which has been constituted over various assets and take possession of those assets, which could adversely affect our liquidity and materially and adversely affect our business and operations. In addition, to the extent that we cannot make payments on

accelerated amounts, such non-payment could result in the cross default and/or cross-acceleration of some or all our other outstanding indebtedness, and payment of penalty interest, which could likewise adversely affect our liquidity and materially and adversely affect our business, operations and financial conditions.

7. *Our Company has availed certain unsecured loans which are repayable on demand.*

Our Company has availed certain unsecured loans in the ordinary course of business amounting to ₹ 932.59 Lakh as on June 30, 2023, which is repayable on demand. In the event that these lenders seek a repayment of such loans, we would need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all. If we are unable to procure such financing, any such demand may materially and adversely affect our business, cash flows, financial condition and results of operations.

8. *Any inability on our part to comply with prescribed technical specifications and standards of quality in connection with our products could adversely impact our operations and profitability.*

Our business requires obtaining and maintaining quality certifications and accreditations from independent certification entities as well as some of our customers that enable us to be eligible to participate in orders. Further, we are required to adhere to stringent contractual technical specifications and standards, and our customers may require our manufacturing facilities and products to be pre-approved and/or accredited by various agencies before placing orders for our products. If we fail to adhere to the aforesaid requirements or changes thereto in a timely manner, or at all, our cash flows, operations and/or profitability could be adversely affected. Our top customers may vary from period to period depending on order bookings. Our business and results of operations will be adversely affected if we are unable to develop and maintain a continuing relationship or pre-qualified status with our key customers.

9. *Our operations are subject to high working capital finance requirements. Our inability to obtain and/or maintain sufficient cash flow, credit facilities and other sources of funding, in a timely manner, or at all, to meet our requirement of working capital or pay our debts, could adversely affect our operations, financial condition and profitability.*

We require substantial amounts of working capital for our business operations, and the failure to obtain required working capital on attractive terms or at all, may materially and adversely affect our growth prospects and future profitability. We require substantial capital to maintain and operate our production facilities.

Our total working capital debt as of June 30, 2023, amounting to Rs. 4,102.23 Lakh. We rely on debt financing to meet our working capital requirements. We cannot assure that we will be able to raise additional debt in a timely manner or on acceptable terms in the future to finance our working capital, and this may materially and adversely affect our business.

10. *Our Company has not registered the logo and the tradename that we use. Our ability to use the logo may be impaired if the same is not registered under our name.*

We have not registered the logo and the tradename of our Company which we use although. The registration for the said trademark in our name is important to retain our brand equity. If we do not

register our trademark, we may lose the statutory protection available to us under the Trade Marks Act, 1999 for such trademark. We are unable to assure that the future viability or value of any of our intellectual property. Our Company's business may be affected due to our inability to protect our existing and future intellectual property rights.

11. *Changes in technology may affect our business by making our manufacturing facilities or equipment less competitive.*

Our profitability and competitiveness are in large part dependent on our ability to respond to technological advances and emerging industry standards and practices on a cost-effective and timely basis. Changes in technology may make newer generation manufacturing equipment more competitive than ours or may require us to make additional capital expenditures to upgrade our manufacturing facilities. We need to continue to invest in new and more advanced technologies and equipment to enable us to respond to emerging industry standards and practices in a cost-effective and timely manner that is competitive with other textile manufacturing companies and other methods of manufacturing. The development and implementation of such technology entails technical and business risks. We cannot assure you that we will be able to successfully implement new technologies or adapt our processing systems to customer requirements or emerging industry standards. If we are unable to adapt in a timely manner to changing market conditions, customer requirements or technological changes, our business and financial performance could be adversely affected.

12. *Any prolonged business interruption at our manufacturing facilities could have a material adverse effect on the results of our operations and profitability.*

Any material interruption at our manufacturing facilities, including but not limited to power failure, fire and unexpected mechanical failure of equipment's and pandemic conditions could reduce our ability to meet the conditions of our contracts and earnings for the affected period. Irregular or any interruption in supply of power or water are factors that could adversely affect our daily operations. If there is an insufficient supply of electricity or water to satisfy our requirements, we may need to limit or delay our production, which could adversely affect our business, financial condition, and results of operations. We cannot assure you that we will always have access to sufficient supplies of electricity in the future to accommodate our production requirements and planned growth. Similarly, there is no assurance that those of our manufacturing facilities unaffected by an interruption will have the capacity to increase their output to manufacture products for the affected manufacturing facilities, to the extent that all outstanding orders will be fulfilled in a timely manner. In the event of prolonged interruptions in the operations of our manufacturing facilities, we may have to procure various supplies and products to meet our production requirements, which could affect our profitability.

13. *Export destination countries may impose varying duties or enter into free trade agreements with countries other than India. Any increase in such duties or the entry into free trade agreements with countries other than India may materially adversely affect our business, financial condition, and results of operations.*

Our revenues from exports amounted to Rs. 13,784.42 Lakhs in Fiscal 2022-23 and Rs. 1,932.81 Lakh for the quarter ended on June 30, 2023, which represented approximately 77.90% and 60.82% of our revenues from operations for the respective periods. The destination countries impose varying duties on our products. There can be no assurance that the duties imposed by such destination countries will not increase. Any change or increase in such duties may adversely affect our business, financial condition,

and results of operations. Export destination countries may also enter into free trade agreements or regional trade agreements with countries other than India. Such agreements may place us at a competitive disadvantage compared to manufacturers in other countries and may adversely affect our business, financial condition, and results of operations. Further, adverse changes in import policies in countries to which we export our products may have a particularly significant adverse impact on our business, financial condition, and results of operations.

14. We operate in a competitive business environment. Competition from existing players and new entrants and consequent pricing pressures could have a material adverse effect on our business growth and prospects, financial condition, and results of operations.

We face huge competition in our industry from the existing players and new entrants. If there is a change in trend, then it may put pressures on pricing, product quality, turnaround time, order size etc., which may put strain on our profit margins. Failure to compete with producers of man-made fiber may have adverse effect on our business, financial condition, and results of operations.

15. In the event we fail to accurately forecast demand for our products, and accordingly manage our inventory or plan capacity expansions, it may have an adverse effect on our business, cash flows, financial condition and results of operations.

We maintain a level of inventory of raw materials, work in progress and finished goods. We plan our production volumes based on our forecast of the demand for our products. Any error in forecasting could result in surplus stock which would have an adverse effect on our profitability. As of June 30, 2023, work in progress, our inventory of raw materials and finished goods (including traded goods) amounted to ₹ 4,007.07 Lakh. Our high level of inventory increases the risk of loss and storage costs to us as well as increasing the need for working capital to operate our business. Our inability to accurately forecast demand for our products and manage our inventory may have an adverse effect on our business, cash flows, financial condition and results of operations.

16. We are dependent on third party transportation providers for the supply of raw materials and delivery of our products.

As a manufacturing business, our success depends on the smooth supply and transportation of the various raw materials required at our manufacturing units and of our products from manufacturing units to our customers, both of which are subject to various uncertainties and risks. We use third party transportation providers for the supply of most of our raw materials and delivery of our products to domestic and overseas customers. Transportation strikes have had in the past, and could again have in the future, an adverse effect on supplies and deliveries to and from our customers and suppliers. In addition, raw materials, and products maybe lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. There may also be delay in delivery of raw materials and products which may also affect our business and results of operation negatively. Failure to maintain a continuous supply of raw materials or to deliver our products to our customers in an efficient and reliable manner could have a material and adverse effect on our business, financial condition, and results of operations.

17. Under-utilization of our manufacturing capacities could have an adverse effect on our business and financial performance.

Our capacity utilization is affected by the availability of raw materials, industry / market conditions as

well as by the product requirements of, and procurement practice followed by, our customers. In the event that we are unable to procure sufficient raw materials and procure sufficient demand, we would not be able to achieve full capacity utilization of our current manufacturing facilities, resulting in operational inefficiencies which could have a material adverse effect on our business and financial condition. Further, we have made certain investments for the expansion of our manufacturing capacities. The success of any capacity expansion and expected return on investment on capital invested is subject to, among other factors, the ability to procure requisite regulatory approvals in a timely manner; recruit and ensure satisfactory performance of personnel to further grow our business; and the ability to absorb additional infrastructure costs and develop new expertise and utilize the expanded capacities as anticipated. In case of oversupply in the industry or lack of demand, we may not be able to utilize our expanded capacity efficiently.

Our Company's overall capacity utilization is dependent on various factors, including demand for our products, availability of raw materials, customer preferences, our ability to manage our inventory and implement our growth strategy of improving operational efficiency. Under-utilization of our manufacturing capacities over extended periods, or significant under-utilization in the short term, could materially and adversely impact our business, growth prospects and future financial performance.

18. ***Inconsistent product quality could lead to customer dissatisfaction, hampering reputation, sales and business which may materially and adversely affect our business and prospects.***

We face business risks relating to our products not meeting the customer's technical specifications or the required quality standards. We have prescribed stringent quality checks and continue to improve its resource utilization and minimize in-process rejections by leveraging quality tests across all manufacturing facilities. We are focused on improving quality systems and their effectiveness to lessen the incidence of such risks and simultaneously improving its operational efficiencies. However, there can be no assurance that there could still not be some deviation from prescribed quality standards due to factors such as human error. Despite putting in place strict quality control procedures we cannot assure that our products will always be able to satisfy our clients/customer's quality standards. Any negative publicity regarding our Company, or products, including those arising from any deterioration in quality of our products from our vendors, or any other unforeseen events could adversely affect our reputation and our operations. Introduction of new products or for any other reason, any failure on our part to meet our customers' expectation could adversely affect our business, result of operations and financial condition. Such risks may be controlled, but not eliminated, by adherence to good manufacturing practices and finished product testing. We have little, if any, control over proper handling once our products are delivered to our customers. In case our products do not meet the customer, requirements or fails to adhere to the technical specifications or quality standards, our customers may cancel the order. Any such cancellation by our customers may adversely affect our reputation and brand image, which could adversely affect our business, results of operations and financial condition.

19. ***We are dependent on our senior management and other key personnel as well as certain intermediaries, and the loss of, or our inability to attract or retain, such persons could adversely affect our business, results of operations, financial condition, and cash flows.***

Our performance depends largely on the efforts and abilities of our senior management and other key personnel. We believe that the inputs and experience of our senior management in particular, and other key personnel are valuable for the development of our business and operations and the strategic directions taken by our Company. For further information of our key management personnel, refer

chapter “*Our Management*” on page 88. There can be no assurance that these individuals or any other member of our senior management team will not leave us or join a competitor or that we will be able to retain such personnel or find adequate replacements in a timely manner, or at all. We may require a long period of time to hire and train replacement personnel when qualified personnel terminate their employment with our Company. We may also be required to increase our levels of employee compensation more rapidly than in the past to remain competitive in attracting employees that our business requires. The loss of the services of such persons may have an adverse effect on our business, results of operations, financial condition, and cash flows.

- 20. *We require various licenses and approvals for undertaking our business and if we fail to obtain, maintain, or renew our statutory and regulatory licenses, permits and approvals required to operate our business, our business and results of operations may be adversely affected.***

Our operations are subject to government regulations, and we are required to obtain and maintain several statutory and regulatory permits, approvals, and consents under central, state, and local government rules in India, generally for carrying out our business and for each of our manufacturing facilities. The introduction of additional government control or newly implemented laws and regulations, depending on the nature and extent thereof and our ability to make corresponding adjustments, may adversely affect our business, results of operations and financial condition. In particular, decisions taken by regulators concerning economic policies or goals that are inconsistent with our interests could adversely affect our results of operations. These laws and regulations and the way in which they are implemented and enforced may change from time to time and there can be no assurance that future legislative or regulatory changes will not have an adverse effect on our business, financial condition, cash flows and results of operations.

Further, certain approvals for our manufacturing facilities are required to be applied or renewed on an ongoing basis. The approvals required by us are subject to numerous conditions and we cannot assure you that these would not be suspended or revoked in the event of non-compliance or alleged noncompliance with any terms or conditions thereof, or pursuant to any regulatory action. If there is any failure by us to comply with the applicable regulations or if the regulations governing our business are amended, we may incur increased costs, be subject to penalties, have our approvals and permits revoked or suffer a disruption in our operations, any of which could adversely affect our business. In case we fail to comply with these requirements, or a regulator alleges we have not complied with these requirements, we may be subject to penalties and compounding proceedings.

- 21. *If we are unable to successfully execute our growth strategies, our business prospects, and results of operations could be materially and adversely affected.***

We propose to expand our business by adopting a series of strategies. Our growth depends on our ability to expand our market share and our inability to do so may adversely affect our growth prospects. Our growth strategies could place significant demand on our management and our administrative, operational, and financial infrastructure. We could also encounter difficulties and delays in executing our growth strategies due to several factors, including, without limitation, delays in implementation, lack of appropriate infrastructure, unavailability of human and capital resources, or any other risks that we may or may not have foreseen. Our management may also change its view on the desirability of current strategies, and any resultant change in our strategies could put significant strain on our resources. Further, we may be unable to achieve any synergies or successfully integrate any acquired business into our portfolio. Any business that we acquire may subject us to additional liabilities,

including unknown or contingent liabilities, liabilities for failure to comply with laws and regulations, and we may become liable for the past activities of such businesses.

22. *If we are unable to collect our dues and receivables from our customers, our results of operations and cash flows could be materially and adversely affected.*

Our business depends on our ability to successfully obtain payment from our customers of the amount they owe us for the products delivered in timely manner. Our Company generally extends the benefit of a credit period of up to 120 days to its customers, however, the same is not uniform and it varies on a case-to-case basis. Our average credit cycle has been 103 days in Fiscal 2023.

We cannot assure you that we will be able to accurately assess the creditworthiness of our customers. Macroeconomic conditions could also result in financial difficulties for our customers, including limited access to the credit markets, insolvency, or bankruptcy. Such conditions could cause customers to delay payment, request modifications of their payment terms, or default on their payment obligations to us, cause us to enter into litigation for non-payment, all of which could increase our receivables. If we are unable to meet our contractual obligations, we might experience delays in the collection of, or be unable to collect, our customer balances, and if this occurs, our results of operations and cash flows could be adversely affected. In addition, if we experience delays in billing and collection for our products, our cash flows could be adversely affected. Any significant decrease in or discontinuation of products manufactured from our products by customers in the industry or other industries from which we derive significant revenues in the future may reduce the demand for our products.

23. *Wage pressures and increases in operating costs in India may prevent us from sustaining our competitive advantage and may reduce our profit margins.*

Wage costs and operating costs have historically been significantly lower in India than wage costs and operating costs in the United States, Europe, and other developed economies; and these reduced costs have been one of the sources of our competitive strengths. However, any increase in wage and operating expense in India may prevent us from sustaining this competitive advantage and may negatively affect our profit margins. Wages in India are increasing at a faster rate than in the developed economies, which could result in increased employee benefit expenses. We may need to continue to increase the levels of our employee compensation to remain competitive and manage attrition. Compensation increases manifest a hike in operational costs which may result in a material adverse effect on our business and financial condition and result of operations.

24. *We are subject to export and import controls that could adversely impact our business.*

We are subject to export and import control laws that limit us to where and to whom we can sell our products which could result in postponements or cancellations of product orders. In addition, various countries have enacted laws that could limit our ability to distribute our products or could limit our customers' ability to implement our products in those countries. Changes in our products or changes in export and import regulations may create delays in the introduction of our products in international markets, prevent our customers with international operations from deploying our products throughout their global systems or, in some cases, prevent the export or import of our products to certain countries altogether. Any change in export or import regulations or related legislation, shift in approach to the enforcement or scope of existing regulations, or change in the countries, persons or technologies targeted by such regulations, could result in decreased use of our products by, or in our decreased ability

to export or sell our products to, existing or potential customers with international operations. Delays caused by our compliance with regulatory requirements in obtaining or maintaining any regulatory approvals that may, in the future, be required to operate our business could materially affect our business and operating results. We may also be unable to secure raw materials components or software for our capital equipment due to export control laws, as a result of which, our supply chain may be disrupted and we may be unable to provide our products to customers, which can result in a loss of business for us.

25. *Our operations could be adversely affected by strikes, work stoppages or increased wage demands by our employees or any other kind of disputes with our employees.*

As of June 30, 2023, we have employed 296 personnel across our operations. Although we have not experienced any material labor unrest in the past, we cannot assure you that we will not experience disruptions in work due to disputes or other problems with our work force, which may adversely affect our ability to continue our business operations. Any labor unrest directed against us, could directly or indirectly prevent, or hinder our normal operating activities, and, if not resolved in a timely manner, could lead to disruptions in our operations. These actions are impossible for us to predict or control and any such event could adversely affect our business, results of operations and financial condition.

26. *Our insurance coverage may not be adequate, and this may have an adverse effect on our business and revenues.*

We could face liabilities for accidents that occur at our manufacturing facilities or otherwise arise out of our operations. In the event of personal injuries, fires or other accidents suffered by our employees or other people, we could face claims alleging that we were negligent, provided inadequate supervision or be otherwise liable for the injuries. Our principal types of coverage include standard fire and special perils insurance policy, money insurance policy and burglary insurance policy.

While we believe that the insurance coverage which we maintain would be reasonably adequate to cover the normal risks associated with the operation of our business, we cannot assure you that any claim under the insurance policies maintained by us will be honored fully, in part or on time, or that we have taken out sufficient insurance to cover all our losses. In addition, our insurance coverage expires from time to time. We apply for the renewal of our insurance coverage in the normal course of our business, but we cannot assure you that such renewals will be granted in a timely manner, at acceptable cost or at all. To the extent that we suffer loss or damage for which we did not obtain or maintain insurance, and which is not covered by insurance, exceeds our insurance coverage where our insurance claims are rejected, the loss would have to be borne by us and our results of operations, cash flows and financial performance could be adversely affected.

27. *Compliance with, and changes in, environmental, health and safety laws and regulations or stringent enforcement of existing environmental, health and safety laws and regulations may result in increased liabilities and increased capital expenditures may adversely affect our cash flows, business results of operations and financial condition.*

Our operations are subject to environmental, health and safety and other regulatory and/ or statutory requirements in the jurisdictions in which we operate. Our operations may generate pollutants and waste, some of which may be hazardous. We are accordingly subject to various national, state, municipal and local laws and regulations concerning environmental protection in India, including laws addressing the

discharge of pollutants into the air and water, the management and disposal of any hazardous substances, and wastes and the clean-up of contaminated sites. We cannot assure you that compliance with such laws and regulations will not result in a material increase in our costs or otherwise have an adverse effect on our financial condition, cash flows and results of operations. Further, manufacturing activities in India are also subject to various health and safety laws and regulations as well as laws and regulations governing their relationship with their respective employees in areas such as minimum wages, maximum working hours, overtime, working conditions, hiring, and terminating employees and work permits. Accidents, in particular fatalities, may have an adverse impact on our reputation and may result in fines and/or investigations by public authorities as well as litigation from injured workers or their dependents. Non-compliance with these laws and regulations, which among other things, limit or prohibit emissions or spills of toxic substances produced in connection with our operations, could expose us to civil penalties, criminal actions, and revocation of key business licenses. Environmental laws and regulations in India are becoming more stringent, and the scope and extent of new environmental regulations, including their effect on our operations, cannot be predicted with any certainty. In case of any change in environmental or pollution regulations, we may be required to invest in, among other things, environmental monitoring, pollution control equipment, and emissions management. As a consequence of unanticipated regulatory or other developments, future environmental and regulatory related expenditures may vary substantially from those currently anticipated. We cannot assure you that our costs of complying with current and future environmental laws and other regulations will not adversely affect our business, results of operations or financial condition.

- 29. *The deployment of funds raised through this Issue shall not be subject to monitoring by any monitoring agency and shall be purely dependent on the discretion of the management of our Company.***

Since the size of the Issue is less than ₹10,000 lakhs, no monitoring agency is required to be appointed by our Company to oversee the deployment of funds raised through this Issue. The deployment of funds raised through this Issue, is hence, at the discretion of the management and the Board of Directors of our Company and will not be subject to monitoring by any independent agency. The Board of Directors of our Company through Audit Committee will monitor the utilization of the Issue proceeds. Any inability

on our part to effectively utilize the Issue proceeds could adversely affect our business and financial condition.

ISSUE SPECIFIC RISKS

30. *Our Company will not distribute the Draft Letter of Offer and Application Form to certain overseas Shareholders who have not provided an address in India for service of documents.*

Our Company will dispatch the Draft Letter of Offer, the Abridged Letter of Offer, Rights Entitlement Letter and Application Form (the “Offering Materials”) to such Shareholders who have provided an address in India for the service of documents. The Offering Materials will not be distributed to addresses outside India on account of restrictions that apply to the circulation of such materials in various overseas jurisdictions. However, the Companies Act requires companies to serve documents at any address, which may be provided by the members as well as through e- mail. Presently, there is a lack of clarity under the Companies Act, 2013, and the rules thereunder, with respect to the distribution of Offering Materials to retail individual shareholders in overseas jurisdictions where such distribution may be prohibited under applicable laws of such jurisdictions.

31. *The Rights Entitlement of Eligible Equity Shareholders holding Equity Shares in physical form (“Physical Shareholder”) may lapse in case they fail to furnish the details of their demat account to the Registrar.*

In accordance with the SEBI Circular SEBI/HO/CFD/DIL2/CIR/P/2020/13 dated January 22, 2020, the credit of Rights Entitlement and Allotment of Equity Shares shall be made in dematerialized form only. The proportionate ownership and voting interest in our Company of Eligible Equity Shareholders who fail (or are not able) to exercise their Rights Entitlements will be diluted. Renounees may not be able to apply in case of failure in completion of renunciation through off-market transfer in such a manner that the Rights Entitlements are credited to the demat account of the

- 33. *Any future issuance of Equity Shares, or convertible securities or other equity-linked securities by our Company may dilute your shareholding and any sale of Equity Shares by our Promoter or members of our Promoter Group may adversely affect the trading price of the Equity Shares.***

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by our Company may dilute your shareholding in our Company; adversely affect the trading price of the Equity Shares and our ability to raise capital through an issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. We cannot assure you that we will not issue additional Equity Shares.

The disposal of Equity Shares by any of our Promoter and Promoter Group, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. We cannot assure you that our Promoter and Promoter Group will not dispose of, pledge or encumber their Equity Shares in the future.

- 34. *You may not receive the Equity Shares that you subscribe in the Issue until fifteen days after the date on which this Issue closes, which will subject you to market risk.***

- 35. *There is no guarantee that our Equity Shares will be listed in a timely manner or at all which may adversely affect the trading price of our Equity Shares.***

In accordance with Indian law and practice, final approval for listing and trading of the Equity Shares will not be granted by the Stock Exchanges until after those Equity Shares have been issued and allotted. Approval will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on Stock Exchanges. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares. Further, historical trading prices, therefore, may not be indicative of the prices at which the Equity Shares will trade in the future which may adversely impact the ability of our shareholders to sell the Equity Shares or the price at which shareholders may be able to sell their Equity Shares at that point of time.

- 36. *Holder of Equity Shares could be restricted in their ability to exercise pre-emptive rights under Indian law and could thereby suffer future dilution of their ownership position.***

Under the Companies Act, any company incorporated in India must offer its holders of equity shares pre-emptive rights to subscribe and pay for a proportionate number of shares to maintain their existing ownership percentages prior to the issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of the shares voted on

such resolution, unless our Company has obtained government approval to issue without such rights. However, if the law of the jurisdiction that you are in does not permit the exercise of such pre-emptive rights without us filing an offering document or registration statement with the applicable authority in such jurisdiction, you will be unable to exercise such pre-emptive rights unless we make such a filing. We may elect not to file a registration statement in relation to pre-emptive rights otherwise available by Indian law to you. To the extent that you are unable to exercise pre-emptive rights granted in respect of the Equity Shares, your proportional interests in us would be reduced.

37. Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

38. Negative public opinion could damage our reputation and adversely affect our earnings.

Reputation risk, or the risk to our business, earnings and capital from negative public opinion, is inherent in our business. Negative public opinion can result from our actual or alleged conduct in any number of activities including but not limited to corporate governance, and actions taken by government regulators and community organizations in response to those activities. Negative public opinion can also result from media coverage, whether accurate or not. Negative public opinion can adversely affect our ability to attract and retain customers, trading counterparties and employees and can expose us to litigation and regulatory action. Although we take steps to minimize reputation risk in dealing with our customers and communities, this risk will always be present in our organization.

External Risks

39. Our business is affected by prevailing economic, political, and other prevailing conditions in India and the markets we currently service.

Our results of operations and financial condition depend significantly on prevailing economic conditions in India and our results of operations are affected by factors influencing the Indian economy. Various factors may lead to a slowdown in the Indian economy, which in turn may adversely impact our business, prospects, financial performance, and operations. In the past, the Indian economy has been affected by global economic uncertainties, liquidity crisis, domestic policies, global political environment, volatility in interest rates, currency exchange rates, commodity and electricity prices, volatility in inflation rates and various other factors. Accordingly, high rates of inflation in India could increase our employee costs and decrease our operating margins, which could have an adverse effect on our results of operations. Any slowdown in the economy of the markets in which we operate may adversely affect our business and financial performance of our business and operation.

40. *We face substantial competition in the textile business, both from Indian and international companies, which may adversely affect our revenues.*

We face significant competition from existing players and potential entrants in the Indian textile industry. The Indian textile industry is highly competitive. We face competition mainly from large vertically integrated and diversified companies as well as new companies. Some of our international competitors are larger than us and have greater financial resources. Additionally, we work closely with both our suppliers and our customers in the textile industry. If such a supplier or customer considers backward or forward integrating and diversifying their operations, this may not only result in the loss of such supplier and/or customer, but will also result in increased competition. Increased competition could result in price reductions, decreased sales, lower profit margins or losses in market share, any of which could have an adverse effect on our business, results of operations and financial condition.

41. *Export destination country may impose varying duties or enter into free trade agreements with countries other than India.*

Any increase in such duties or the entering into free trade agreements with countries other than India may materially and adversely affect our business, financial condition and results of operations. There can be no assurance that the duties imposed by such country will not increase. Additionally, export destination country may also enter into free trade agreements or regional trade agreements with countries other than India. Such agreements and alteration of any existing tax treaties may lead to increased competition or may even place us at a competitive disadvantage compared to manufacturers in other countries and could adversely affect our business, financial condition and results of operations. Further, changes in import policies in the country to which we export our products may have a significant adverse impact on our business, financial condition and results of operations.

42. *Any downgrading of India's debt rating by a domestic or international rating agency could adversely affect our business.*

There could be a downgrade of India's sovereign debt rating due to various factors, including changes in tax or fiscal policy, or a decline in India's foreign exchange reserves, which are outside our control. Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India, which may cause fluctuations in the prices of our Equity Shares. This could have an adverse effect on our business and financial performance, and ability to obtain financing for expenditures.

43. *Terrorist attacks, civil disturbances, regional conflicts, and other acts of violence in India and abroad may disrupt or otherwise adversely affect the Indian economy, the health of which our business depends on.*

India has from time to time experienced social and civil unrest and terrorist attacks. These events could lead to political or economic instability in India. Events of this nature in the future could have a material adverse effect on our ability to develop our business. As a result, our business, results of operations and financial condition may be adversely affected. India has also experienced social unrest, Naxalite

violence and communal disturbances in some parts of the country. If such tensions occur in places where we operate or in other parts of the country, leading to overall political and economic instability, it could adversely affect our business, results of operations, financial condition, and trading price of our Equity Shares.

44. *Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws and regulations may adversely affect our business results of operations, cash flows and financial performance.*

Changes in the operating environment, including changes in tax law, could impact the determination of our tax liabilities for any given tax year. Taxes and other levies imposed by the Government of India that affect our industry include income tax, goods and services tax and other taxes, duties or surcharges introduced from time to time. The tax scheme in India is extensive and subject to change from time to time. Any adverse changes in any of the taxes levied by the Government of India may adversely affect our competitive position and profitability. We cannot assure you that the Government of India may not implement new regulations and policies which will require us to obtain approvals and licenses from the Government of India and other regulatory bodies or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the applicability, interpretation, and implementation of any amendment to, or change to governing laws, regulation, or policy in the countries in which we operate may materially and adversely affect our business, results of operations and financial condition. In addition, we may have to incur expenditure to comply with the requirements of any new regulations, which may also materially harm our results of operations. We are also subject to these risks in all our overseas operations depending on each specific country. Any unfavorable changes to the laws and regulations applicable to us could also subject us to additional liabilities. As a result, any such changes or interpretations may adversely affect our business, financial condition, and financial performance. Further, changes in capital gains tax or tax on capital market transactions or sale of shares may affect investor returns.

GLOBAL OUTLOOK

INTRODUCTION

Global growth appears to have lost pace from the third quarter of 2023, after having quickened in the first half of the year relative to the preceding six months. Headline indicators suggest that labour market tightness in advanced economies (AEs) is easing, with weak wage growth adjusted for inflation dampening consumer spending and confidence. In this group of countries, manufacturing activity is either stagnating or contracting and services are moderating from a robust expansion. Europe's biggest economies ended the third quarter in contraction, according to purchasing managers' indices (PMIs). Globally, the modest easing of inflation from historical highs in 2022 has not been enough to recoup real income losses. Tight financial conditions engendered by higher-for-longer stances in monetary policy settings have punctured asset price inflation, with surging bond yields forcing equity markets into correction and sending up the US dollar from strength to strength. Fears are rife that these levels of real interest rates will prolong as neutral rates appear higher, triggering off retreats from risky assets, loan delinquencies, fall in house prices, impediments to rollovers, and other such financial stresses. In some AEs, bank lending is beginning to show these strains. It is also reported that global deals involving mergers and acquisitions are languishing at a 10-year low as high-interest rates chill activity in equity markets. This has adverse implications for the global foreign direct investment (FDI) cycle, already in a slump.

By contrast, several emerging market economies (EMEs), especially in Asia and among the BRICS barring China, have posted positive growth surprises. Their PMIs are in expansion. These countries are standing up to formidable global headwinds that keep stampeding capital flows out of their equity and debt markets and imposing relentless downward pressure on their currencies. Nevertheless, growth profiles in this group are varied, reflecting country-specific circumstances. Ominously, however, the recent rally in crude prices is undermining the overall prospects of these economies. They also appear increasingly vulnerable to sell-offs and safe haven flights. The situation is compounded by rising food prices, a geopolitical fallout. Several EMEs – and even advanced peers - are tapping into foreign exchange reserves to help shore up their currencies or are engaging in open mouth interventions.

The US dollar's strength is now a global risk, tightening the already tight financial conditions even more. Even as energy importers reel under the impact of soaring crude oil prices that resurrect the spectre of inflation alongside external vulnerabilities, the US dollar gets ever stronger on the heft of surging treasury

yields, creating a pernicious feedback loop. The more this toxic vortex persists, the greater is the pain for the world. Will the global economy be able to weather crude trading at current levels, especially with elevated energy prices turbocharging the US dollar? Monetary policy authorities facing these combined pressures may remain on guard for longer – in fact, even pauses are being accompanied by higher future rates guidance. Fiscal authorities in many countries may be forced to extend fossil fuel subsidies. Eventually, these forces can take down the global economy by weakening its main engines, notably the US and India. The end game could be to the detriment of all. Indeed, there is a view that an inflection point in the global monetary policy tightening cycle has already been reached, with signs of global activity slowing. Financial market traders too are sensing that this transition is being approached – they are pricing in no further rate increases by AEs and beginning of rate cuts by EMEs.

Global trade has lagged global growth through the first half of 2023, with merchandise trade volume having contracted at its fastest annual pace since the pandemic and the tourism-fired rebound in services trade is showing some signs of softening. This downturn has been broad-based in the third quarter, with most of the world reporting falling trade volumes. Although the World Trade Organization (WTO) points to strong automobile production and sales containing the downturn, upward momentum in the third quarter and beyond may be limited as long as export orders, container shipping, air freight and raw materials demand remain weak. Global import demand remains anemic, weighed down by sluggish economic growth in leading economies, including the European Union (EU) and China. The United Nations Conference on Trade and Development (UNCTAD) forecasts global trade in goods and services to grow by barely 1 per cent through the year as whole, the slowest since the end of the World War II. The piling up of unresolved disputes at the WTO seems to bear this out as world trade fragments, geopolitical strife engulfs the earth from Ukraine to Israel and beyond, rendering the world trading order teetering on the abyss of irrelevance.

In recent editions of the State of the Economy, we have been flagging climate risks. Europe announced its hottest September on record in 2023. At the UN Climate Ambition Summit on September 20, back-tracking on green policies was highlighted, even as countries brace up for COP 28 which will provide yet another opportunity to accelerate action to limit global warming. According to the International Energy Agency (IEA), meeting net zero goals will require tripling of renewable energy capacities to 11,000 gigawatts by 2030, increasing annual investment in clean energy from US\$ 1 trillion to US\$ 4.5 trillion by the early 2030s and driving a large portion of these investments to emerging and developing countries. Fossil fuel use, if prolonged, needs to be accompanied by emissions-capturing technology. The main problem is the distribution of climate finance which is skewed towards those countries that have financial resources and infrastructure ready to ensure transition to low-carbon activity. By contrast, the global south faces a daunting disparity in the availability of climate finance, rendering their climate ambitions distant and making them increasingly vulnerable to natural disasters. No country can address the impact of climate change by itself, but frayed international cooperation has been described as the ‘Achilles heel of reaching our global climate targets.’ Global action for climate change also has to be isolated from geopolitical tensions. The pathway to net zero has to be equitable; this will necessarily involve differential timelines.

It is the season of forecast revisions again. The OECD is among those presenting an upward revision, observing that India’s ‘growth surprise’ has been positive, with notable strength reflected in its PMIs, and fostering a steady outlook. According to it, India’s robust output growth has been supported by a strong expansion of investment and, on a sectoral level, the continued strength of services. The government’s infrastructure projects have supported momentum in the construction sector. Export growth in respect of services such as information technology and consulting has been strong and relatively unaffected by the slowdown in global growth. The Asian Development Bank has pointed out that strong private consumption

and upticks in public and private investment are expected to brighten India's outlook, although it foresees a slight downward revision for 2023-24 due to erratic rainfall patterns. Our view is that they will all eventually gravitate to the Monetary Policy Committee's (MPC's) projection of 6.5 percent real GDP growth for the year 2023-24.

High frequency indicators discussed in subsequent sections show a broad-based gaining of momentum in August and September. The festival season is all set to light up volumes of e-commerce sales. Entry-level prices of electronics are poised to fall despite the focus on 'premiumisation'. Consumer confidence is upbeat on online shopping, with wider choices, competitive pricing, and the convenience of easy return and exchange lifting up the online shopping experience. In response, pan-India demand for warehousing has outgrown supply by an estimated 1.4 times, with an average growth of 10 percent in rentals. Rural consumers also appear to be ready to join the party: there is a revival in demand for fast moving consumer goods after the September showers despite an uptick in freight and packaging costs. With Kharif sowing acreage exceeding last year's coverage, joblessness in rural areas fell in September.

Residential real estate markets across India's cities are exhibiting a growth momentum that is scaling a six-year high, despite rising mortgage rates and property prices. The cloud to this silver lining is that there are bulk sales in the mid-income and premium segments while the affordable and low-cost segments are undergoing a decline in volume. Overall, the real estate industry is reflecting strong fundamentals.

In the corporate sector, rating agencies are reporting credit ratios – upgrades by downgrades – of more than one. The upgrade rates has moderated but remains higher than the decadal average while the downgrade rate also undershot its 10-year average. Both investment- and non-investment grade companies recorded improvements in credit profiles. Infrastructure, automotive, and cement companies that rely on local consumption harnessed robust cash flows to bolster balance sheets, pointing to a possible revival due in private capex. A secular improvement is underway for financials of rated companies, which is boosting credit ratios. Deleveraging and higher capacity utilisation have enabled capital-heavy industries to stage a broad-based improvement in performance and outlook. In the financial markets, the festival mood is lifting sentiments. In September, primary equity markets sizzled, with the most number of initial public offerings (IPOs) in the past 13 years amidst a buoyant rally in mid-and small-cap stocks. This has been propelled by ebullient inflows into several small and mid-cap funds. The India volatility index (VIX), an equity market fear gauge, has remained subdued during the first half of 2023-24, indicative of the bullish market sentiment.

In the bond market, yields have shown remarkable resilience and stability in the face of the rise in US yields, attributable to country-specific factors such as the announcement of inclusion in the JP Morgan emerging market bond index, responsible government market borrowings indicative of underlying fiscal health, and prudent debt and liquidity management. Both passive and active funds are expected to flow into Indian debt markets, but they may bring with them associated volatility which will need to be carefully and nimbly managed.

The Indian rupee (INR) has also exhibited low volatility and orderly movements relative to peers in spite of the elevated US treasury yields and a stronger US dollar. Movements in the INR are consistent with the strength of the underlying macro-fundamentals and the reassuring availability of buffers.

Term deposit rates have surged to their highest levels in the past five years as banks rush to meet strong credit demand. There is anecdotal evidence that funds are flowing from low-yielding current account savings account (CASA) to higher-interest bearing term deposits. Competition among banks for garnering deposits has intensified after a long hiatus. The structural liquidity mismatch in the banking system is also reflected in

the highest issuances of certificates of deposits (CDs) in September during the current financial year. Outflows on account of tax payments and increased demand for credit ahead of the festival season have also tightened access to liquidity. Renewed government spending and the release of the last tranche of the incremental cash reserve ratio (I-CRR) will likely ease liquidity but CD raising will likely continue into October.

An important development that has spread cheer all around is the sharp correction in headline inflation in its September print from the recent spike in July and August. Vegetable prices may correct even more in October and expand disposable incomes of consumers. From the point of view of the conduct of monetary policy, the broad-based softening of core inflation has been a result of staying the straight and narrow course of excoriating inflation enduringly.

The accumulated force of monetary policy actions and an unswerving disinflationary stance of withdrawing accommodation are yielding results in the form of dissipating the persistence of price pressures, aided by the receding of input costs. It is too early to declare victory though; there are many miles to go.

Set against this backdrop, the remainder of the article is structured into four sections. Section II covers the rapidly evolving developments in the global economy. An assessment of domestic macroeconomic conditions is set out in Section III. Section IV encapsulates financial conditions in India, while the last Section sets out concluding remarks.

INDIAN ECONOMY OVERVIEW

Introduction

The Indian economy exhibited robust resilience in 2022-23 amidst a global turmoil following the war in Ukraine, and recorded a growth of 7.0 per cent, the highest among major economies in the world. Barring the Omicron wave scare early in the year 2022, COVID-19 was largely on the ebb for most part of the year helping in restoration of consumer and business confidence. Contact-intensive activity gradually resuscitated during the year and the release of pent-up demand bolstered domestic activity. Sound macroeconomic fundamentals, a resilient financial system reflected in healthy balance sheets of banks and non-banking financial companies (NBFCs), and a deleveraged corporate sector imparted resilience to counter the adverse global spillovers (Source: RBI Annual Report 2022-23)

Strong economic growth in the first quarter of FY 2022-23 helped India overcome the UK to become the fifth-largest economy after it recovered from repeated waves of COVID-19 pandemic shock. Real GDP in the first quarter of 2022–23 is currently about 4% higher than its corresponding 2019-20, indicating a strong start for India's recovery from the pandemic. Given the release of pent-up demand and the widespread vaccination coverage, the contact-intensive services sector will probably be the main driver of development in 2022–2023. Rising employment and substantially increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers, and with the revival in monsoon and the Kharif sowing, agriculture is also picking up momentum. The contact-based services sector has largely demonstrated promise to boost growth by unleashing the pent-up demand over the period of April-September 2022. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

MARKET SIZE

India's nominal gross domestic product (GDP) at current prices is estimated to be at Rs. 232.15 trillion (US\$ 3.12 trillion) in FY22. With more than 100 unicorns valued at US\$ 332.7 billion, India has the third-largest unicorn base in the world. The government is also focusing on renewable sources to generate energy and is planning to achieve 40% of its energy from non-fossil sources by 2030.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 and 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between 2023 and 2030. India's current account deficit (CAD), primarily driven by an increase in the trade deficit, stood at 2.1% of GDP in the first quarter of FY 2022-23.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Mr. Piyush Goyal, Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles, Indian exports are expected to reach US\$ 1 trillion by 2030.

RECENT DEVELOPMENTS

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With an improvement in the economic scenario and the Indian economy recovering from the Covid-19 pandemic shock, several investments and developments have been made across various sectors of the economy. ROAD AHEAD

In the second quarter of FY 2022-23, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2022. India's comparatively strong position in the external sector reflects the country's generally positive outlook for economic growth and rising employment rates. India ranked fifth in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022. India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in FY 2022–23 (until August 2022), stood 46.8% higher than the same period last year. The ratio of revenue expenditure to capital outlay decreased from 6.4 in the previous year to 4.5 in the current year, signaling a clear change in favour of higher-quality spending. Stronger revenue generation as a result of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels. Despite the continued global slowdown, India's exports climbed at the second highest rate this quarter. With a reduction in port congestion, supply networks are being restored. The CPI-C and WPI inflation reduction from April 2022 already reflects the impact. In August 2022, CPI-C inflation was 7.0%, down from 7.8% in April 2022. Similarly, WPI inflation has decreased from 15.4% in April 2022 to 12.4% in August 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

Our marketing team constantly monitors and scours the trends in the market. Regular interaction is required to maintain the client base and to gain insight into the design and specification needs of the diverse clientele in domestic and international markets.

We constantly seek to grow our product reach to underpenetrated geographies, increase the penetration of our products in markets in which we are currently present and widen the portfolio of our products available in those markets by growing our network. Our success is dependent on our ability to enter and expand our network in new markets which is further dependent on our familiarity with the economic condition, customer base and commercial operations in new regions. With limited presence, our ability to gain market share is also dependent on our ability to compete with companies that may have an existing strong presence.

However, we may not be successful in expanding our network or increasing our market presence. Further, we may also face disruptions in selling our products for various reasons such as transportation bottlenecks, raw material inaccessibility, competition activities, labor issues, natural disasters, absence of professional & technical expertise, etc. which may result in disruptions to our business.

ANNEXURE A TO THE AUDITORS' REPORT

Report on the Internal Financial Controls Under Clause (I) of sub section (3) of Section 143 of The Companies Act, 2013 ('the Act')

We have audited the internal financial controls over financial reporting of Ashnoor Textile Mills Limited ("the Company") as of March 31, 2023 in conjunction with our audit of the standalone financial statements of the Company for the year ended on that date.

Management's Responsibility for the Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note of Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditor's Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit.

We conducted our audit in accordance with Guidance Note of Audit of Internal Financial Controls over Financial Reporting (the 'Guidance Note') and the Standards on Auditing, issued by the ICAI and deemed to be prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting were established and maintained and if such controls operated effectively in all material aspects.

Our audit involves performing procedures to obtain audit evidence about adequacy of the internal financial controls over financial reporting and their operating effectiveness.

Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and disposition of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of the Management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detections of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statement.

Inherent Limitations of Internal Financial Control over Financial Reporting

Because of the inherent limitations of internal financial control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of internal financial control over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31 March, 2023, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note of Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India.

Actual results could differ from those estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revision to accounting estimates is recognised in the period in which the estimate is revised and in any future period affected.

h) Cash and Cash Equivalents

Cash comprises cash on hand and demand deposits. The Company considers cash equivalents as all short term balances (with an original maturity of three months or less from the date of acquisition), highly liquid investments that are readily convertible into known amounts of cash and which are subject to an insignificant risk of changes in value.

i) Cash Flow Statement

Cash flow Statement is prepared in accordance with the indirect method, whereby net profit/(loss) before tax is adjusted for the effects of transactions of a non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from operating, investing and financing activities of the company are segregated.

Finance Cost

- i. Borrowing costs include exchange differences arising from foreign currency borrowings to the extent they are regarded as an adjustment to the interest cost. Borrowing costs that are directly attributable to the acquisition or construction of qualifying assets are capitalized as part of the cost of such assets. A qualifying asset is one that necessarily takes substantial period of time to get ready for its intended use.
- ii. Interest income earned on the temporary investment-of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalization.

- iii. All other borrowing costs are charged to the Statement of Profit and Loss for the period for which they are incurred.

k) Inventories

- i. Inventory of raw material, packing material, fuels, consumables, dyes and chemicals, are valued on Lower of Cost and Net Realizable Value. Cost is calculated on First in First out (FIFO) basis of costing and is net of subsequently recoverable duties and taxes.
- ii. Stock in progress is valued at Lower of Cost and Net Realizable Value. Costs include raw material cost, ascertained on the basis of average cost of purchases, and direct cost incurred up to the stage of production of Grey Yarn, processing and fabrication. Inventory lying for more than six months is valued at half of cost of production.
- iii. Finished goods are valued at Lower of Cost and Net Realizable Value. Cost includes raw material cost, ascertained on the basis of average cost of purchases, and direct cost. Old inventory lying for more than six months is valued at half of cost of production. Inventory of rejected finished goods is valued at Net Realizable Value.
- iv. Inventory of carpets and trading items is valued on lower of cost and net realizable value.
- v. Inventory of waste is valued on net realizable value.
- vi. Stores and Spares are charged to expenses on purchase and no inventory is maintained.

l) Investments

Long Term investments are valued at cost. Provision for decrease in market value of the short-term investment is created in the books as unrealized losses.

m) Retirement Benefits

Retirement benefits have been accounted for on accrual basis. Provision of Gratuity is created for the employees who became eligible after completing five years of services under the Payment of Gratuity Act, 1972. Provision of Gratuity has not been provided on the managerial remuneration.

n) Provisions, contingent liabilities and contingent assets

- i. A provision is recognized when an enterprise has a present obligation as a result of past event; it is probable that an outflow of resources will be required to settle the obligation, in respect of which a reliable estimate can be made. Provisions are not discounted to its present value and are determined based on best estimate required to settle the obligation at balance sheet date. These are reviewed at each balance sheet date and adjusted to reflect the current best estimates.
- ii. Where it is not probable that an outflow of economic benefits will be required or the amount cannot be estimated reliably, the obligation is disclosed as contingent liability in notes to accounts, unless the probability of outflow of economic benefits is remote.
- iii. Contingent Assets are not recognised in the financial statements but are disclosed, where an inflow of economic benefit is probable. These are reviewed at each balance sheet date and are adjusted to reflect the current management estimate.

o) Revenue Recognition

- i. Sale is recorded on CIF value inclusive of freight, insurance and excise duty recovered from the customers. Sale is recognized on the date of dispatch of goods from factory.
- ii. Export Sale is recorded at the foreign currency exchange rate prevailing on the date of the transaction.
- iii. Sales are recorded on invoice value net of discounts and rebates.

- v. Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency closing rates of exchange at the reporting date.
- vi. Exchange differences arising on settlement or translation of monetary items are recognised in Statement of Profit and Loss except to the extent of exchange differences which are regarded as an adjustment to interest costs on foreign currency borrowings that are directly attributable to the acquisition or construction of qualifying assets, are capitalized as cost of assets.

q) Taxation

Deferred Tax:

Deferred tax is recognized, on timing differences, being the difference between taxable and accounting income that originate in one period and are capable of reversal in one or more subsequent periods. Deferred tax assets in respect of unabsorbed depreciation and carry forward of losses are recognized if there is virtual certainty that there will be sufficient future taxable income available to realize such losses.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Current Tax

Current tax is determined as the amount of tax payable in respect of taxable income for the year. The Company's current tax is calculated using tax rate that has been enacted or substantially enacted by the end of the reporting period.

Minimum Alternate Tax (MAT) paid in accordance with the tax laws, which gives future economic benefits in the form of adjustment to future income tax liability, is considered as an asset if there is convincing evidence that the Company will pay normal income tax. Accordingly, MAT is recognized as an asset in the Balance Sheet when it is probable that future economic benefit associated with it will flow to the Company

r) Financial Instruments

Financial assets and financial liabilities are recognised when the Company becomes a party to the contractual provisions of the financial instruments.

On initial recognition, financial assets and financial liabilities are recognised at historical cost that are attributable to the acquisition or issue of financial assets and financial liabilities. In case of financial assets and financial liabilities which are recognised at fair value through profit and loss (FVTPL), it's transaction costs are recognised in Statement of Profit and Loss.

A. Financial assets:

All regular way purchases or sales of financial assets are recognised and derecognized on a settlement date basis. After initial recognition, financial assets are subsequently measured in their entirety at either amortised cost or fair value, depending on the classification of the financial assets

a. Classification and Measurement of Financial assets (other than Equity instruments)

i. Financial assets at Amortised Cost:

Financial assets that meet the following conditions are subsequently measured at amortised cost using Effective Interest Rate method (EIR):

- the asset is held within a business model whose objective is to hold assets in order to collect contractual cash flows; and
- the contractual terms of the asset give rise on specified dates to cash flows that are Solely Payments of Principal and Interest (SPPI) on the principal amount outstanding.

ii. Financial assets at Fair Value through Other Comprehensive Income (FVTOCI)

A financial asset is measured at FVTOCI if both the following conditions are met:

- The objective of the business model is achieved both by collecting contractual cash flows and selling the financial asset; and
- the contractual terms of the asset give rise on specified dates to cash flows that are Solely Payments of Principal and Interest (SPPI) on the principal amount outstanding.

iii. Financial assets at fair value through profit or loss (FVTPL)

A financial asset is measured at FVTPL unless it is measured at amortised cost or FVTOCI, with all changes in fair value recognised in Statement of Profit and Loss.

b. Impairment of financial assets

i. Subsequent to initial recognition, the Company recognizes expected credit loss (ECL) on financial assets measured at amortised cost. ECL on such financial assets, other than loan assets, is measured at an amount equal to life time expected losses.

ii. The impairment requirements for the recognition and measurement of ECL are equally applied to Loan asset at FVTOCI except that ECL is recognised in other comprehensive income and is not reduced from the carrying amount in the balance sheet.

iii. Impairment of Loan Assets and commitments under Letter of Comfort (LoC):

The Company measures ECL on loan assets at an amount equal to the lifetime ECL if there is credit impairment or there has been significant increase in credit risk (SICR) since initial recognition. If there is no SICR as compared to initial recognition, the Company measures ECL at an amount equal to 12-month ECL. When making the assessment of whether there has been a SICR since initial recognition, the Company considers reasonable and supportable information, that is available without undue cost or effort. If the Company measured loss

allowance as lifetime ECL in the previous period, but determines in a subsequent period that there has been no SICR since initial recognition due to improvement in credit quality, the Company again measures the loss allowance based on 12-month ECL. ECL is measured on individual basis for credit impaired loan assets, and on other loan assets it is generally measured on collective basis using homogenous groups.

- iv. The impairment losses and reversals are recognised in Statement of Profit and Loss.

c. De-recognition of financial assets

- i. The Company derecognizes a financial asset when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another party.
- ii. On de-recognition of a financial asset in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable, and the cumulative gain or loss that had been recognised in other comprehensive income and accumulated in equity, is recognised in Statement of Profit and Loss if such gain or loss would have otherwise been recognised in Statement of Profit and Loss on disposal of that financial asset.

B. Financial liabilities:

- i. All financial liabilities other than derivatives and financial guarantee contracts are subsequently measured at amortised cost using the effective interest rate (EIR) method. EIR is determined at the initial recognition of the financial liability. EIR is subsequently updated for financial liabilities having floating interest rate, at the respective reset date, in accordance with the terms of the respective contract.

ii. De-recognition of financial liabilities

The Company derecognizes financial liabilities when, and only when, the Company's obligations are discharged, cancelled or have expired. The difference between the carrying amount of the financial liability derecognized and the consideration paid and payable is recognised in Statement of Profit and Loss.

s) Fair Value Measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Company takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date.

Fair value for measurement and/or disclosure purposes in these standalone financial statements is determined on such basis, except for share-based payment transactions that are within the scope of Ind AS 102 – Share based Payments, leasing transactions that are within the scope of Ind AS 17 - Leases, and measurements that have some similarities to fair value but are not fair value, such as net realisable value in Ind AS 2 - Inventories or value in use in Ind AS 36 – Impairment of Assets.

In addition, for financial reporting purposes, fair value measurements are categorized into Level 1, 2, or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1 : Quoted prices (unadjusted) in active markets for identical assets or liabilities that the Company can access at the measurement date;
- Level 2 : Inputs other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
- Level 3 : Inputs for the asset or liability that are not based on observable market data (unobservable inputs).

t) **Earning Price Per Share**

Basic earnings per share are computed by dividing the net profit after tax by the weighted average number of equity shares outstanding during the period. Diluted earnings per shares is computed by dividing the profit after tax by the weighted average number of equity shares considered for deriving basic earnings per shares and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares.

We have audited the accompanying financial statements of Ashnoor Textile Mills Limited ("the Company"), which comprise the Balance Sheet as of June 30, 2023, the Statement of Profit and Loss, and the statement of Cash Flow Statement for the period ended.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid standalone financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at June 30, 2023, and profit and its cash flows for the period ended on that date.

Basis for Opinion

We conducted our audit of the financial statements in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Companies Act, 2013. Our responsibilities under those Standards are further described in the Auditor's responsibilities for the audit of the Financial Statements section of our report. We are independent of the Company in accordance with the code of ethics issued by the Institute of Chartered Accountants of India (ICAI) together with the ethical requirements that are relevant to our audit of the Financial Statements under the provisions of the Act and the rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's code of ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion on the financial statements.

Key Audit Matters

This Audited Figures are used for issue of Right issue and calculation of net worth as on June 30, 2023.

Information other than the Financial Statements and Auditors' Report thereon

The Company's management and Board of Directors are responsible for the other information. The other information comprises the information included in the Company's annual report, but does not include the financial statements and our auditors' report thereon. Our opinion on the Financial Statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the Financial Statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the Standalone Financial Statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information; we are required to report that fact. We have nothing to report in this regard.

Responsibility of Management for the Standalone financial statements

The Company's Board of Directors are responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these Financial Statements that give a true and fair view of the financial position, financial performance, changes in equity and Cash Flows of the Company in accordance with the accounting principles generally accepted in India, including the Accounting Standards specified under section 133 of the Act. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statement that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the standalone financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those Board of Directors are also responsible for overseeing the company's financial reporting process

Auditor's Responsibility for the Audit of the Standalone financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these standalone financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the Financial Statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management. Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the Financial Statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the Financial Statements, including the disclosures, and whether the Financial Statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

- (c) Allotment to the Eligible Equity Shareholders who have applied for the full extent of their Rights Entitlement and have also applied for Additional Rights Equity Shares shall be made as far as possible on an equitable basis having due regard to the number of Equity Shares held by them on the Record Date, provided there are unsubscribed Rights Equity Shares after making full Allotment under (a) and (b) above. The Allotment of such Equity Shares will be at the sole discretion of our Board in consultation with the Designated Stock Exchange, as a part of the Issue and will not be a preferential allotment.
- (d) Allotment to Renouncees who having applied for all the Rights Equity Shares renounced in their favour and also have applied for Additional Rights Equity Shares provided there is surplus available after making full Allotment under (a), (b) and (c) above. The Allotment of such Rights Equity Shares shall be made on a proportionate basis as part of the Issue and will not be a preferential allotment.
- (e) Allotment to any other person that our Board may deem fit provided there is surplus available after

making Allotment under (a), (b), (c) and (d) above, and the decision of our Board in this regard shall be final and binding.

- (f) After taking into account Allotment to be made under (a) to (e) above, if there is any unsubscribed portion, the same shall be deemed to be 'unsubscribed' for the purpose of Regulation 3(1)(b) of the SEBI Takeover Regulations.

Upon approval of the Basis of Allotment by the Designated Stock Exchange, the Registrar shall send to the Designated Branches, a list of the ASBA Investors who have been Allotted Rights Equity Shares in the Issue, along with:
